

## UZU Series

**Ambient Temperature Range:** -30°C ~ 170°C

**UZU Series** provides fast response due to the shape of its sensing surface. Its specially-designed mounting structure makes it an excellent temperature-sensor for dehumidifier, refrigerator, and air conditioner.

### Applications

- Dehumanize
- Air conditioner

### Features

- Epoxy Molded
- Hermetic Surface
- Easy Mounting to Pipe
- Lead Wire and Bracket Available

### Specifications

- |                               |                                |
|-------------------------------|--------------------------------|
| - Electrical Ratings          | 15A / 125V AC<br>7.5A / 250V A |
| - Operating Temperature Range | -20°C ~ 170°C                  |
| - Life Cycles                 | 100,000 Cycle                  |
